Dear Folks:

Monday and again writing a letter . Im getting to be pretty good about writing dont you think, even though I dont write much at a time . Theres not much else to do , however.

It has been raining here and is plenty muddy . It is really a mess; you can hardly walk its so slippery.

I received another letter from you today . It was dated April 2 and was no 4 from grandmother . It was the latest one that I have received as yet.

////

Se-veral ships have come in and they should clear out all the men that have been waiting to go home . One of them ,however has been quarantined for small pox .

There seems to be a pretty big epidemic of that stuff over in China. All of us here were vaccinated again for it a few weeks ago. The vaccination is supposed to last for four years but we all had it when we came in the Navy and nearly all need ed it again as most of the vaccinations took.

I am hoping as I tell you every time I write a letter, Im getting to where I see ships in my sleep.

You had better stop sending me film as I think that I am going to sell my camera if I can get the right price for it . They are selling them pretty high out here and I might sell mine for a good price .

I have nothing else to say so I guess that I had better close for now .

Love

Frank
